A Specialised Kwelanga Training Programme

INTRODUCTION

Organisational change management, employee motivation and development, and developing leadership and emotional intelligence competencies are crucial success factors for individuals and organisations in an aggressive 21 Century business environment. Coaching trends are not only challenging individuals to develop and manage themselves but are becoming an integral part of productive performance and accelerated learning. Coaching can help in career progression, strategic planning, skills development, employment equity and in building relationships and leadership potential. Many people at every level of the organisation can facilitate coaching processes and initiatives, producing a positive developmental culture within the organisation.

Providing mentoring is vital for junior management to have a role model who can guide their leadership and management development as well as imparting life skills.

This interactive and practical two day course will equip you with the skills to manage and develop coaching and mentoring skills for yourself and others in your organisation and will involve you from both the coach and coachee perspective.

Hence practising the coaching skills of the GROW model, acting as coachee to understand and analyse the how and why of the model and as the observer, to constructively analyse and criticize colleagues' abilities and skills. Learning the 'Language of Coaching' is vital so the coach does not become directive and take on a teacher role.

VIRTUAL INSTRUCTOR-LED TRAINING

Participants “attend” virtual classroom training, through the Zoom on-line platform, without having to travel to and from the classroom each day. Courses are divided into several shorter sessions to minimise operational disruptions and improve knowledge retention.

Training is facilitated in real-time, providing the benefit of hands on learning. Delegates interact with the facilitator and each other, as with any other classroom experience. This allows for a cooperative learning environment, where participants can share knowledge, engage in positive discussions and work together.

Benefits of Virtual Instructor-Led Training

- ✚ Virtual training provides flexibility to both the client/delegate and facilitator.
- ✚ Delegates are active participants rather than relying entirely on the instructor.
- ✚ Virtual training is conducive to a more fluid exchange of ideas, focused real-life scenarios and an intensified level of engagement.
- ✚ Information is shared through video, documents, and written notes with learners in real-time.
- ✚ Delegates who have internet connection can learn at anytime and anywhere through virtual learning or through recorded videos.
- ✚ Delegates can participate in discussions and ask questions at any time.
- ✚ Breakout rooms allow delegates to work in groups and complete activities in teams which allows for a rich interactive experience.
- ✚ Access to expert facilitators who may otherwise be unable to visit workplaces due to unforeseen circumstances.
- ✚ Use of slides and video clips enhances virtual learning.
